Vocational Pathways At DP

ALKANE RESOURCES LTD

Resourcing tomorrow's technology

About Alkane

Alkane Resources Ltd is an ASX and OTCQX (US) listed multi-commodity mining and exploration company with a focus on gold, zirconium, niobium and rare earths. Our projects are located in the Central West of New South Wales, in eastern Australia. Through our subsidiary Australian Zirconia Limited, we are developing the Dubbo Project (DP), an exciting project based on one of the world's largest in-ground resources of rare metals and rare earths. Due to the size of the resource, the mine is expected to process 1,000,000 tonnes of ore throughput per year over a period of 70 years or more.

Careers at Alkane

Our mining and exploration activities create jobs and economic activity in the Central West of NSW. While many mining companies opt for a fly-in fly-out workforce, we choose to engage local people wherever possible, providing them with training and career opportunities and making them part of the Alkane team.

For more details about the qualifications needed for these jobs, check out the vocational pathways fliers.
