Drilling on shift. Last 2 night on dump trucks on site. Complainant can hear dozer working. "Thought it was on dump this side but went outside and it is on "other side". Noise is now a problem again. Keeping the family awake at night. Family have important committments coming up. Noise was the worst it had ever been. It was noticed it around 9.30pm (7/10/14) when they went to bed and it kept up most of the night. It seemed that every 10 minutes or so there was very loud banging. It was extremely noisy last night, sounded like bangin and trucks. He noticed it from around 11 pm (7/10/14) oawards through the night. Traffic safety issue noticed at mine entrance gate Mine noise very loud and noise could be identified as trucks, beeping horns and loud bangs presumably when they are loading the trucks. Noise from mine keeping complainant awake during the night. Noise was load last night which impacted on the complainant's ability to sleep. A lot of dust seen blowing off site. A lot of dust seen blowing off site and complainant was unwilling to run their evaporative cooler as it was filling with dust. Dust reportedly blowing off the mine site and onto complainants roof. Dust emissions reported. | planning Advice/ information gathered to give thorough answer Large rocks being lowered into the tubs of trucks causing the problem. They were trying to lay them in as cautiously as possible. Followed up The mine crew were ripping the toe in Caloma pit. Follow up discussion with Mine Superintendent and suggested we don't do that task on night shift. Actions are ongoing. Recordings from Noise Sentinel were reviewed and rocks being loaded into trucks could be heard. Report from consultant showed exceedance of Project Approval limits.
